## A Century of **Success**

This year LEO Pharma celebrates its 100th year in pharmaceuticals

### **CHALLENGE | PSORIASIS**

Psoriasis is a disabling skin condition estimated to affect more than 20 million people in North America and Europe. Yet a recent European survey showed that 40 per cent of patients were not using any prescription treatment.

LEO Pharma is a research-based company, with a distinguished heritage in the field of dermatology, and we are dedicated to finding new treatments for psoriasis and other skin conditions.

Our aim is always to offer the newest and best treatment options because all patients have a right to lead a better life. We are also committed to increasing awareness and understanding of psoriasis.

Our commitment is to see the challenges faced by people with psoriasis as our challenges.

**research based, people driven**
